***Election/Restrictions***

Claims 1-20 and 28-35 are pending.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, 16, 18-20, 28, 34, and 35, drawn to polypeptides, nucleic acids encoding the polypeptides, and methods of using the polypeptides and nucleic acids.

Group II, claim(s) 13-15, 17, and 29-33, drawn to antibodies, and methods of use.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, 37 CFR 1.475(b) does not provide for multiple independent products. The polynucleotides and polypeptides of Group I are distinct structurally and functionally from the antibodies of Group II. Since the products are independent, a holding of lack of unity is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

***Sequence Compliance***

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures.

While the sequences disclosed do not comply with the sequence rules cited above, the sequence is deemed non-essential to the examination of this application at this time because the application is being examined for restriction purposes only. Applicant is therefore given the entire period for responding to this action to comply with the sequence rules. **FAILURE TO COMPLY FULLY WITH THE SEQUENCE RULES WITHIN THE RESPONSE PERIOD SET FOR THIS OFFICE ACTION WILL BE CONSIDERED AN INCOMPLETE RESPONSE.**
